

Is a full-cycle software development company.

# SYNERGY SOLUTION

Synergy Solution is a full-cycle software development company. We have put together our dream team, where everyone is united by their love for innovation and personal development.

“

*For us to develop an IT product is a way to make life easier and more pleasant.*

”

# About Us

Synergy Solution is a leading end-to-end digital solutions company working with the world's leading, growing organizations.

Our team consists of individuals united by a love for innovation and personal development. Each product created by our team is improved and corresponds to the latest trends in the IT field.

Our product is the result of the work of our team, which combines unique achievements in the field of information technology, predictive analytics, data science, artificial intelligence and machine learning.

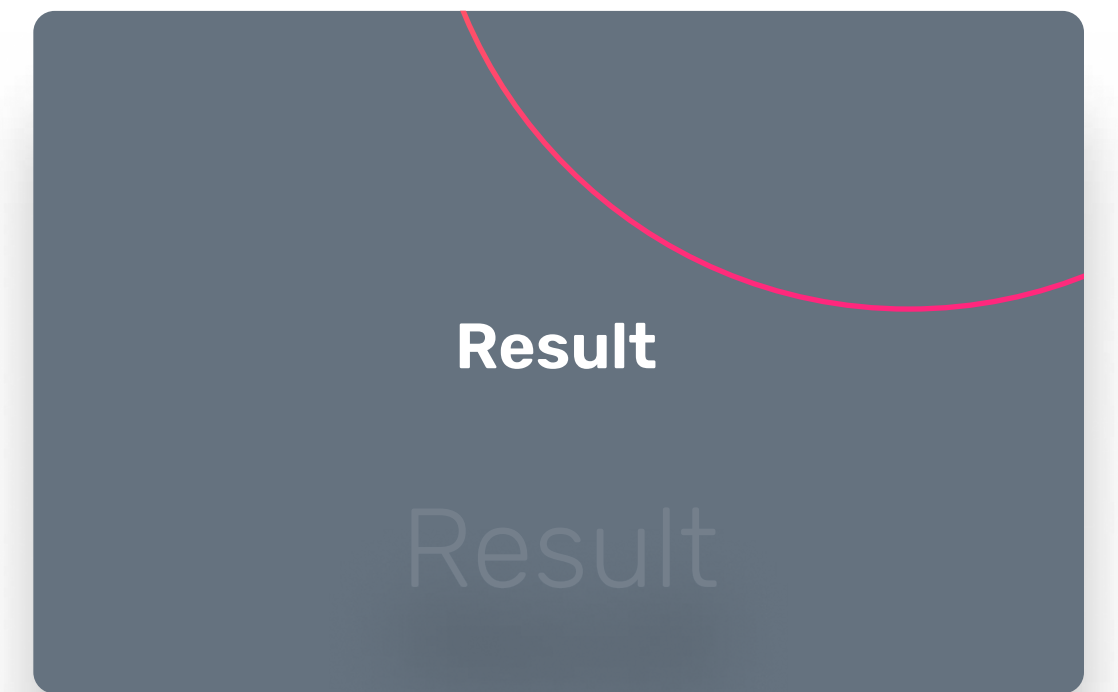

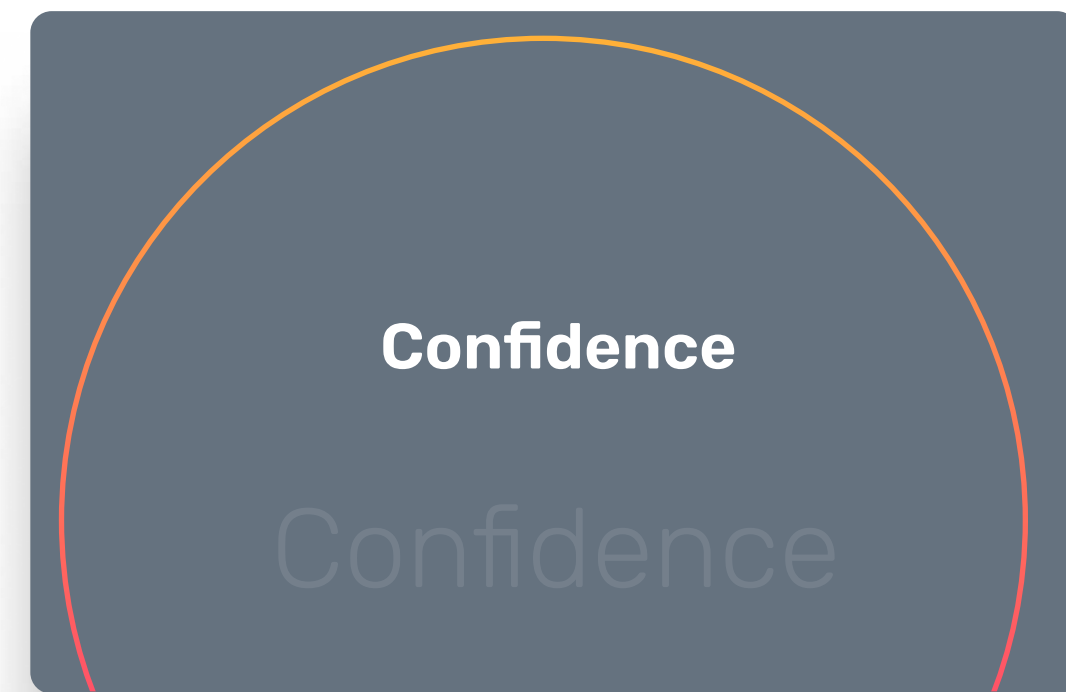

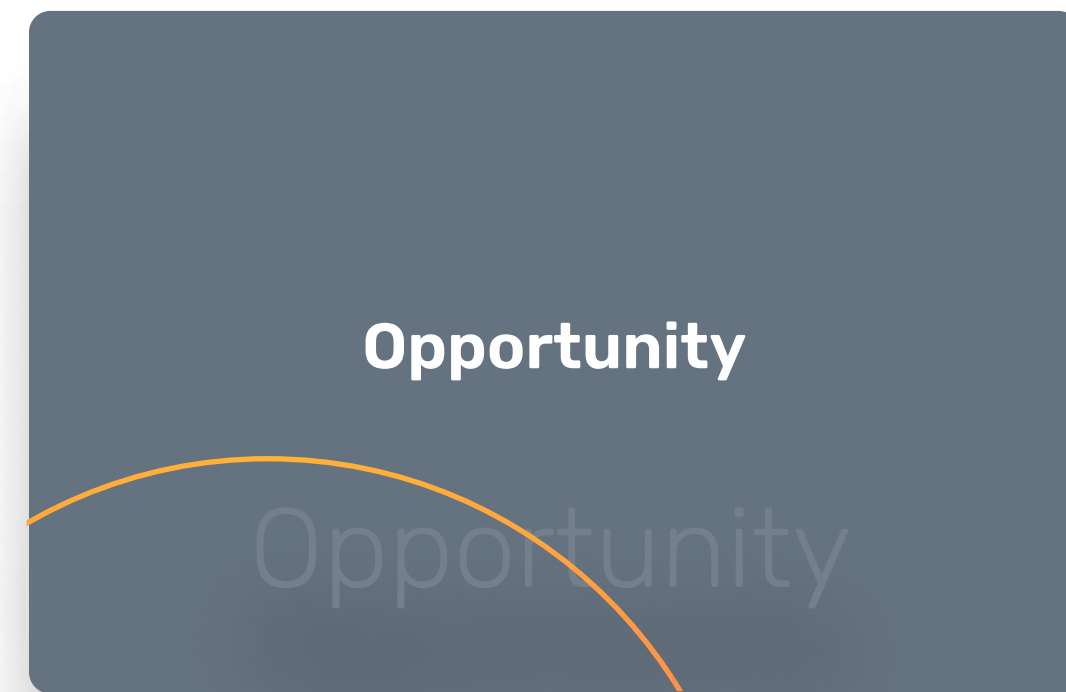

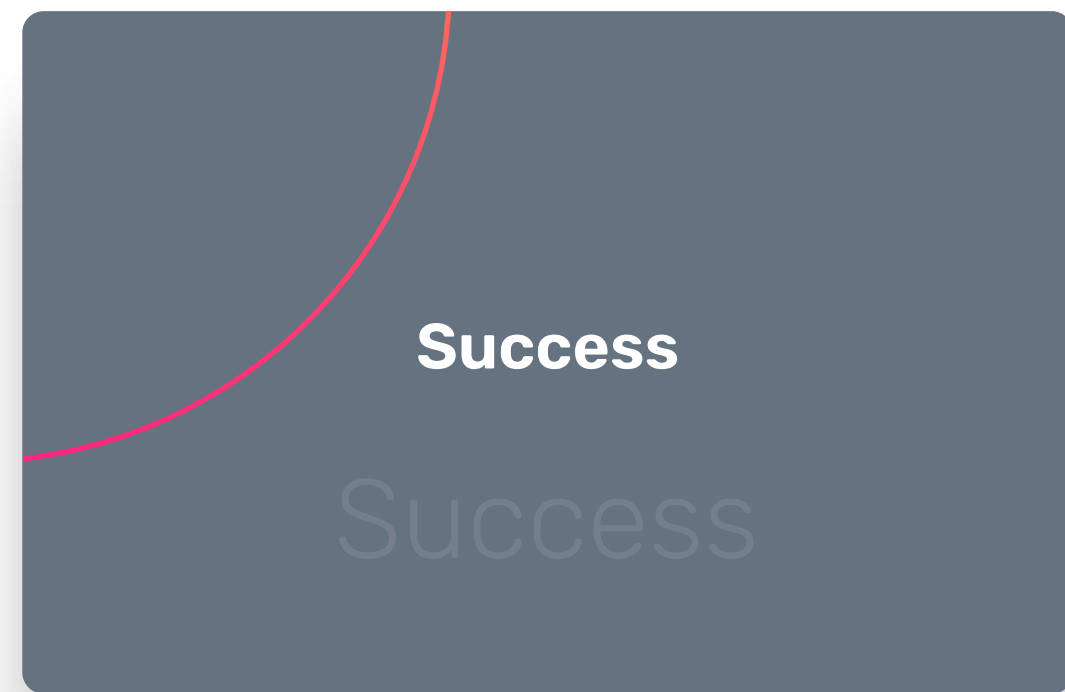

Our team is actively working on creating a new chat based on ChatGPT to completely update our old site <https://synergysolution.ae/>

Before creating a new product, we conduct research and improve existing developments, focusing on the needs and goals of the client and improve our staff.

Our final product is a unique fusion of advances in information technology, predictive analytics, data science, artificial intelligence and machine learning.

# Our Credo

# Our Projects

Our team is actively working on creating a new chat based on ChatGPT to completely update our old site <https://synergysolution.ae/>

# Blackshield Capital

is a group of companies addressing the needs of corporate clients, high-net-worth individuals, financial intermediaries such as banks, institutional investors, multi-family offices, and financial advisors for customized wealth management services and data-driven decisions.

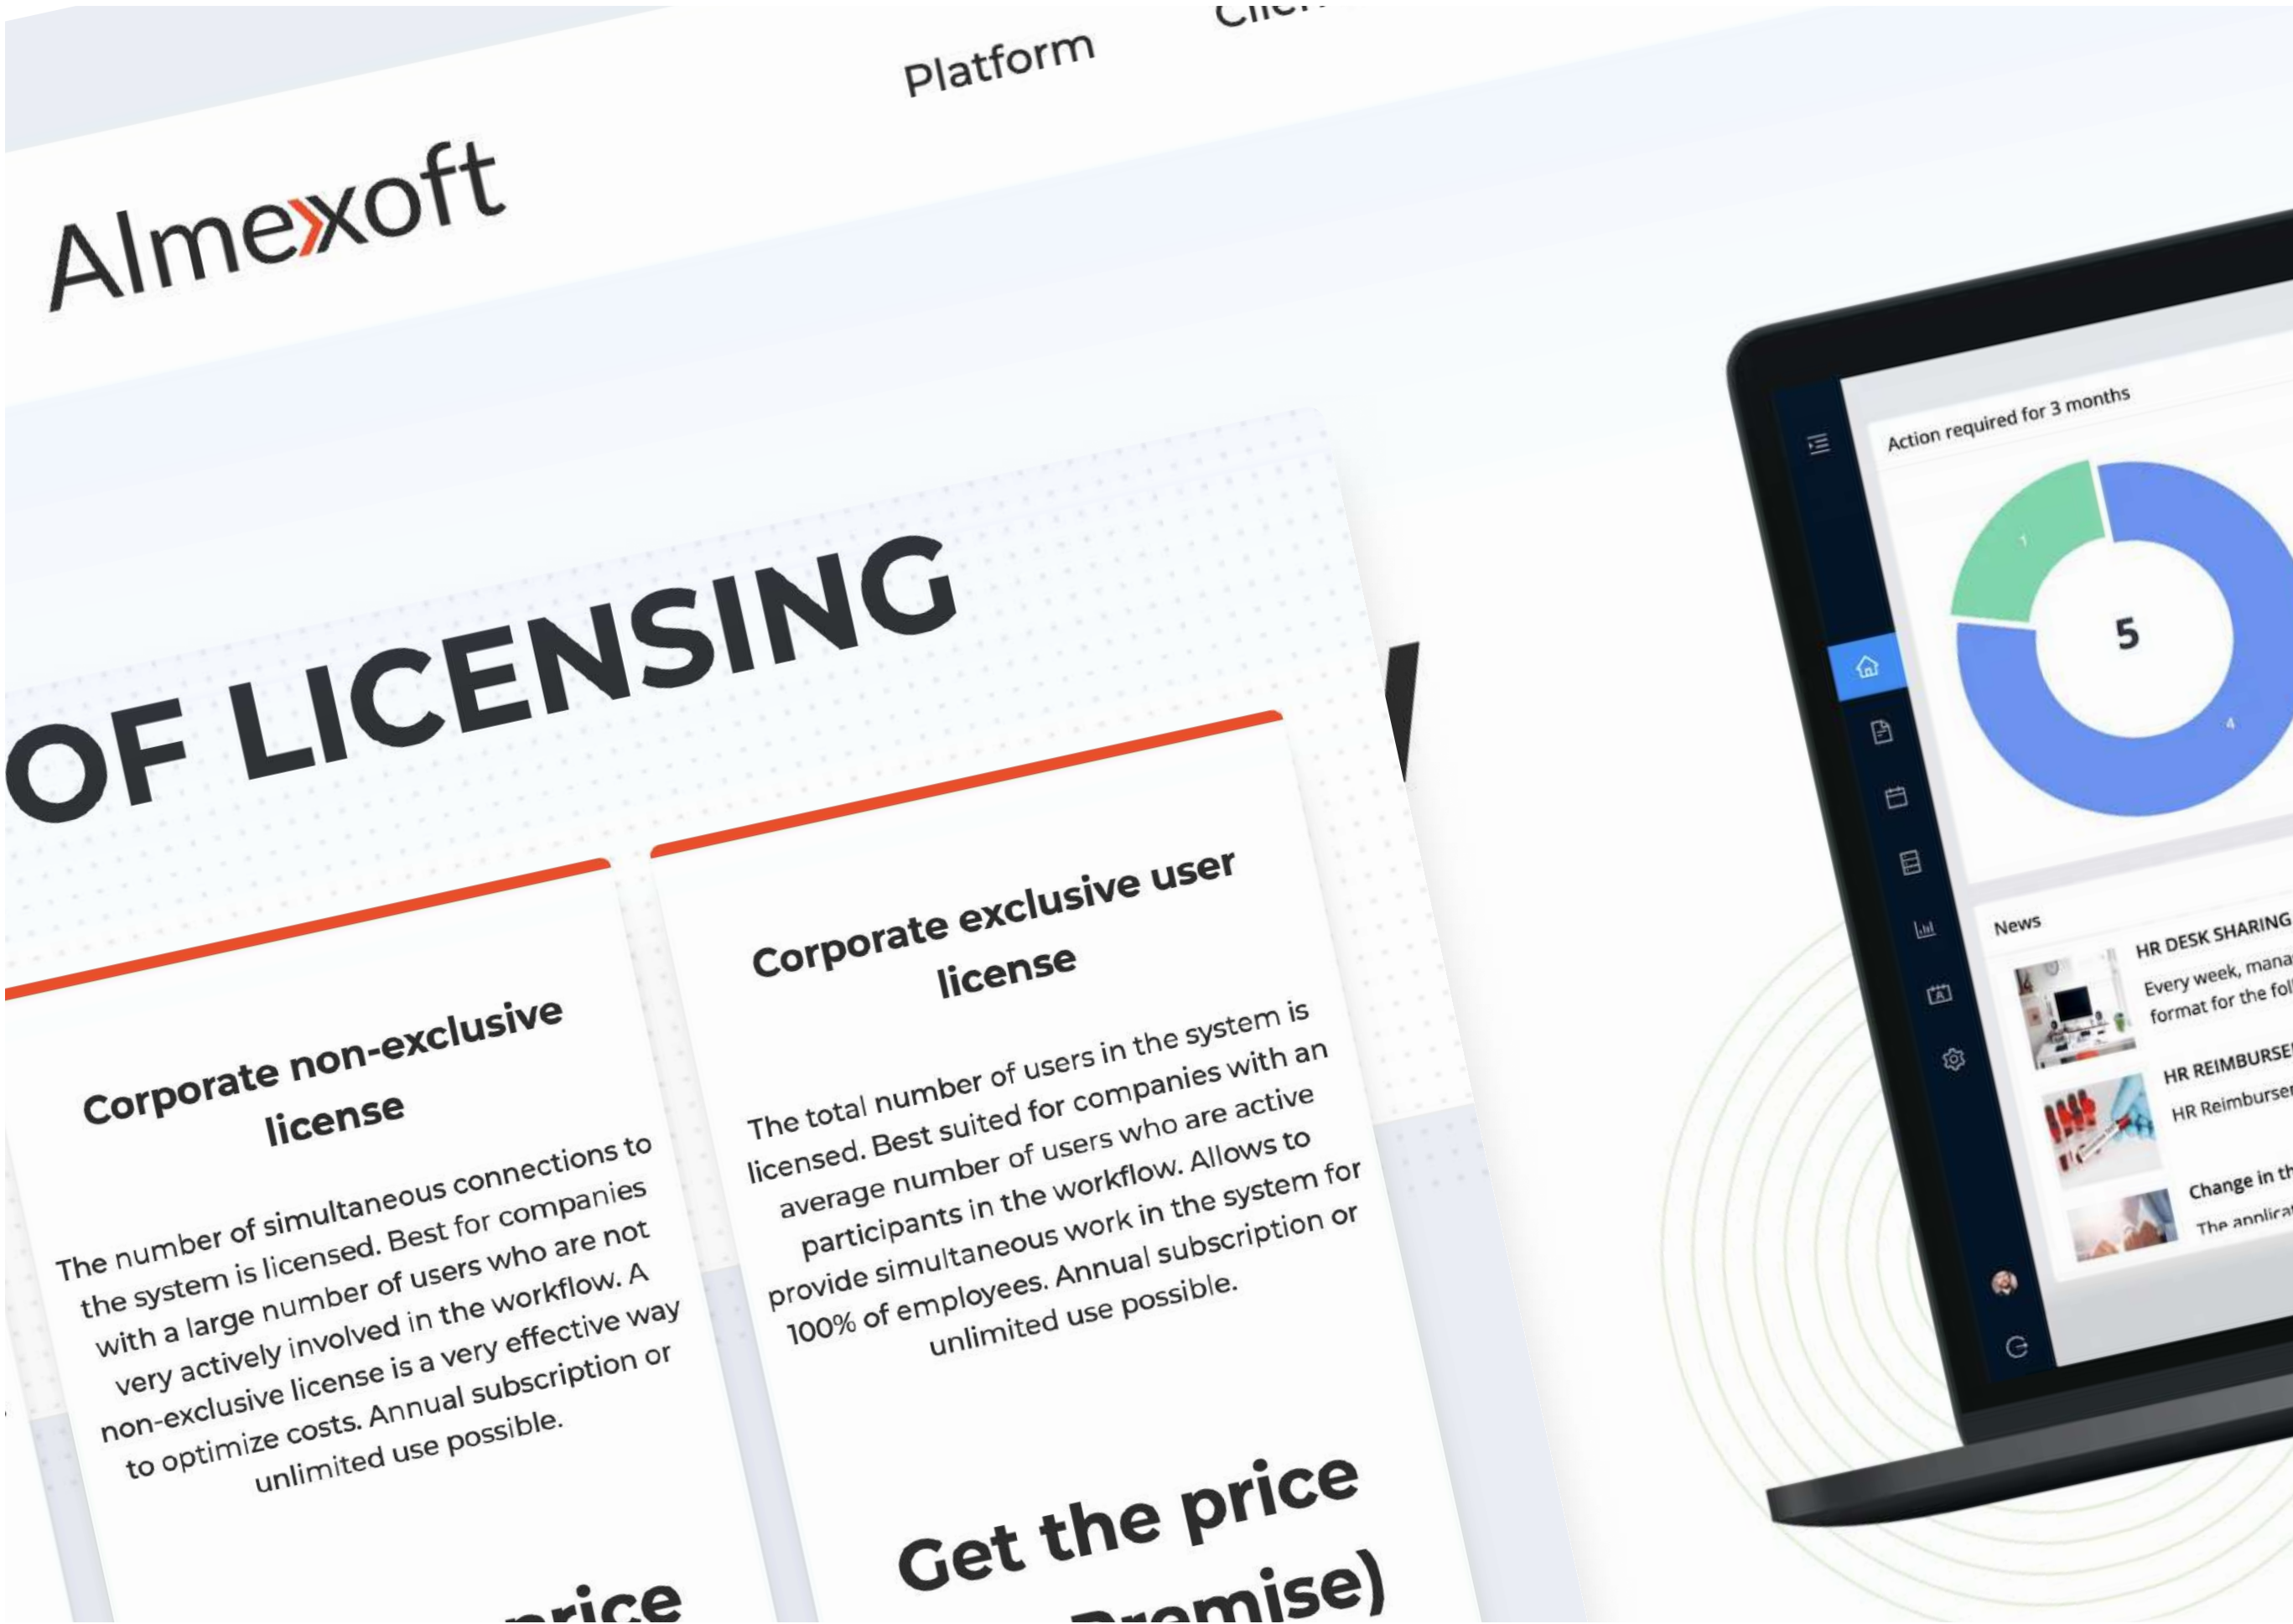

We completely developed the web-site for this company from the idea to its implementation. It seems to have turned out pretty cool.

# Almexoft

is a low-code platform for business process automation and electronic document management

Our team was engaged in product reselling by building profitable marketing offers

# Takion

is a trading platform that is fueled by technologically advanced code and algorithmic smart order routing. We are currently working on the development and implementation of a scoring system that will help Takion to become the “Best-in-Breed” trading platform available today.

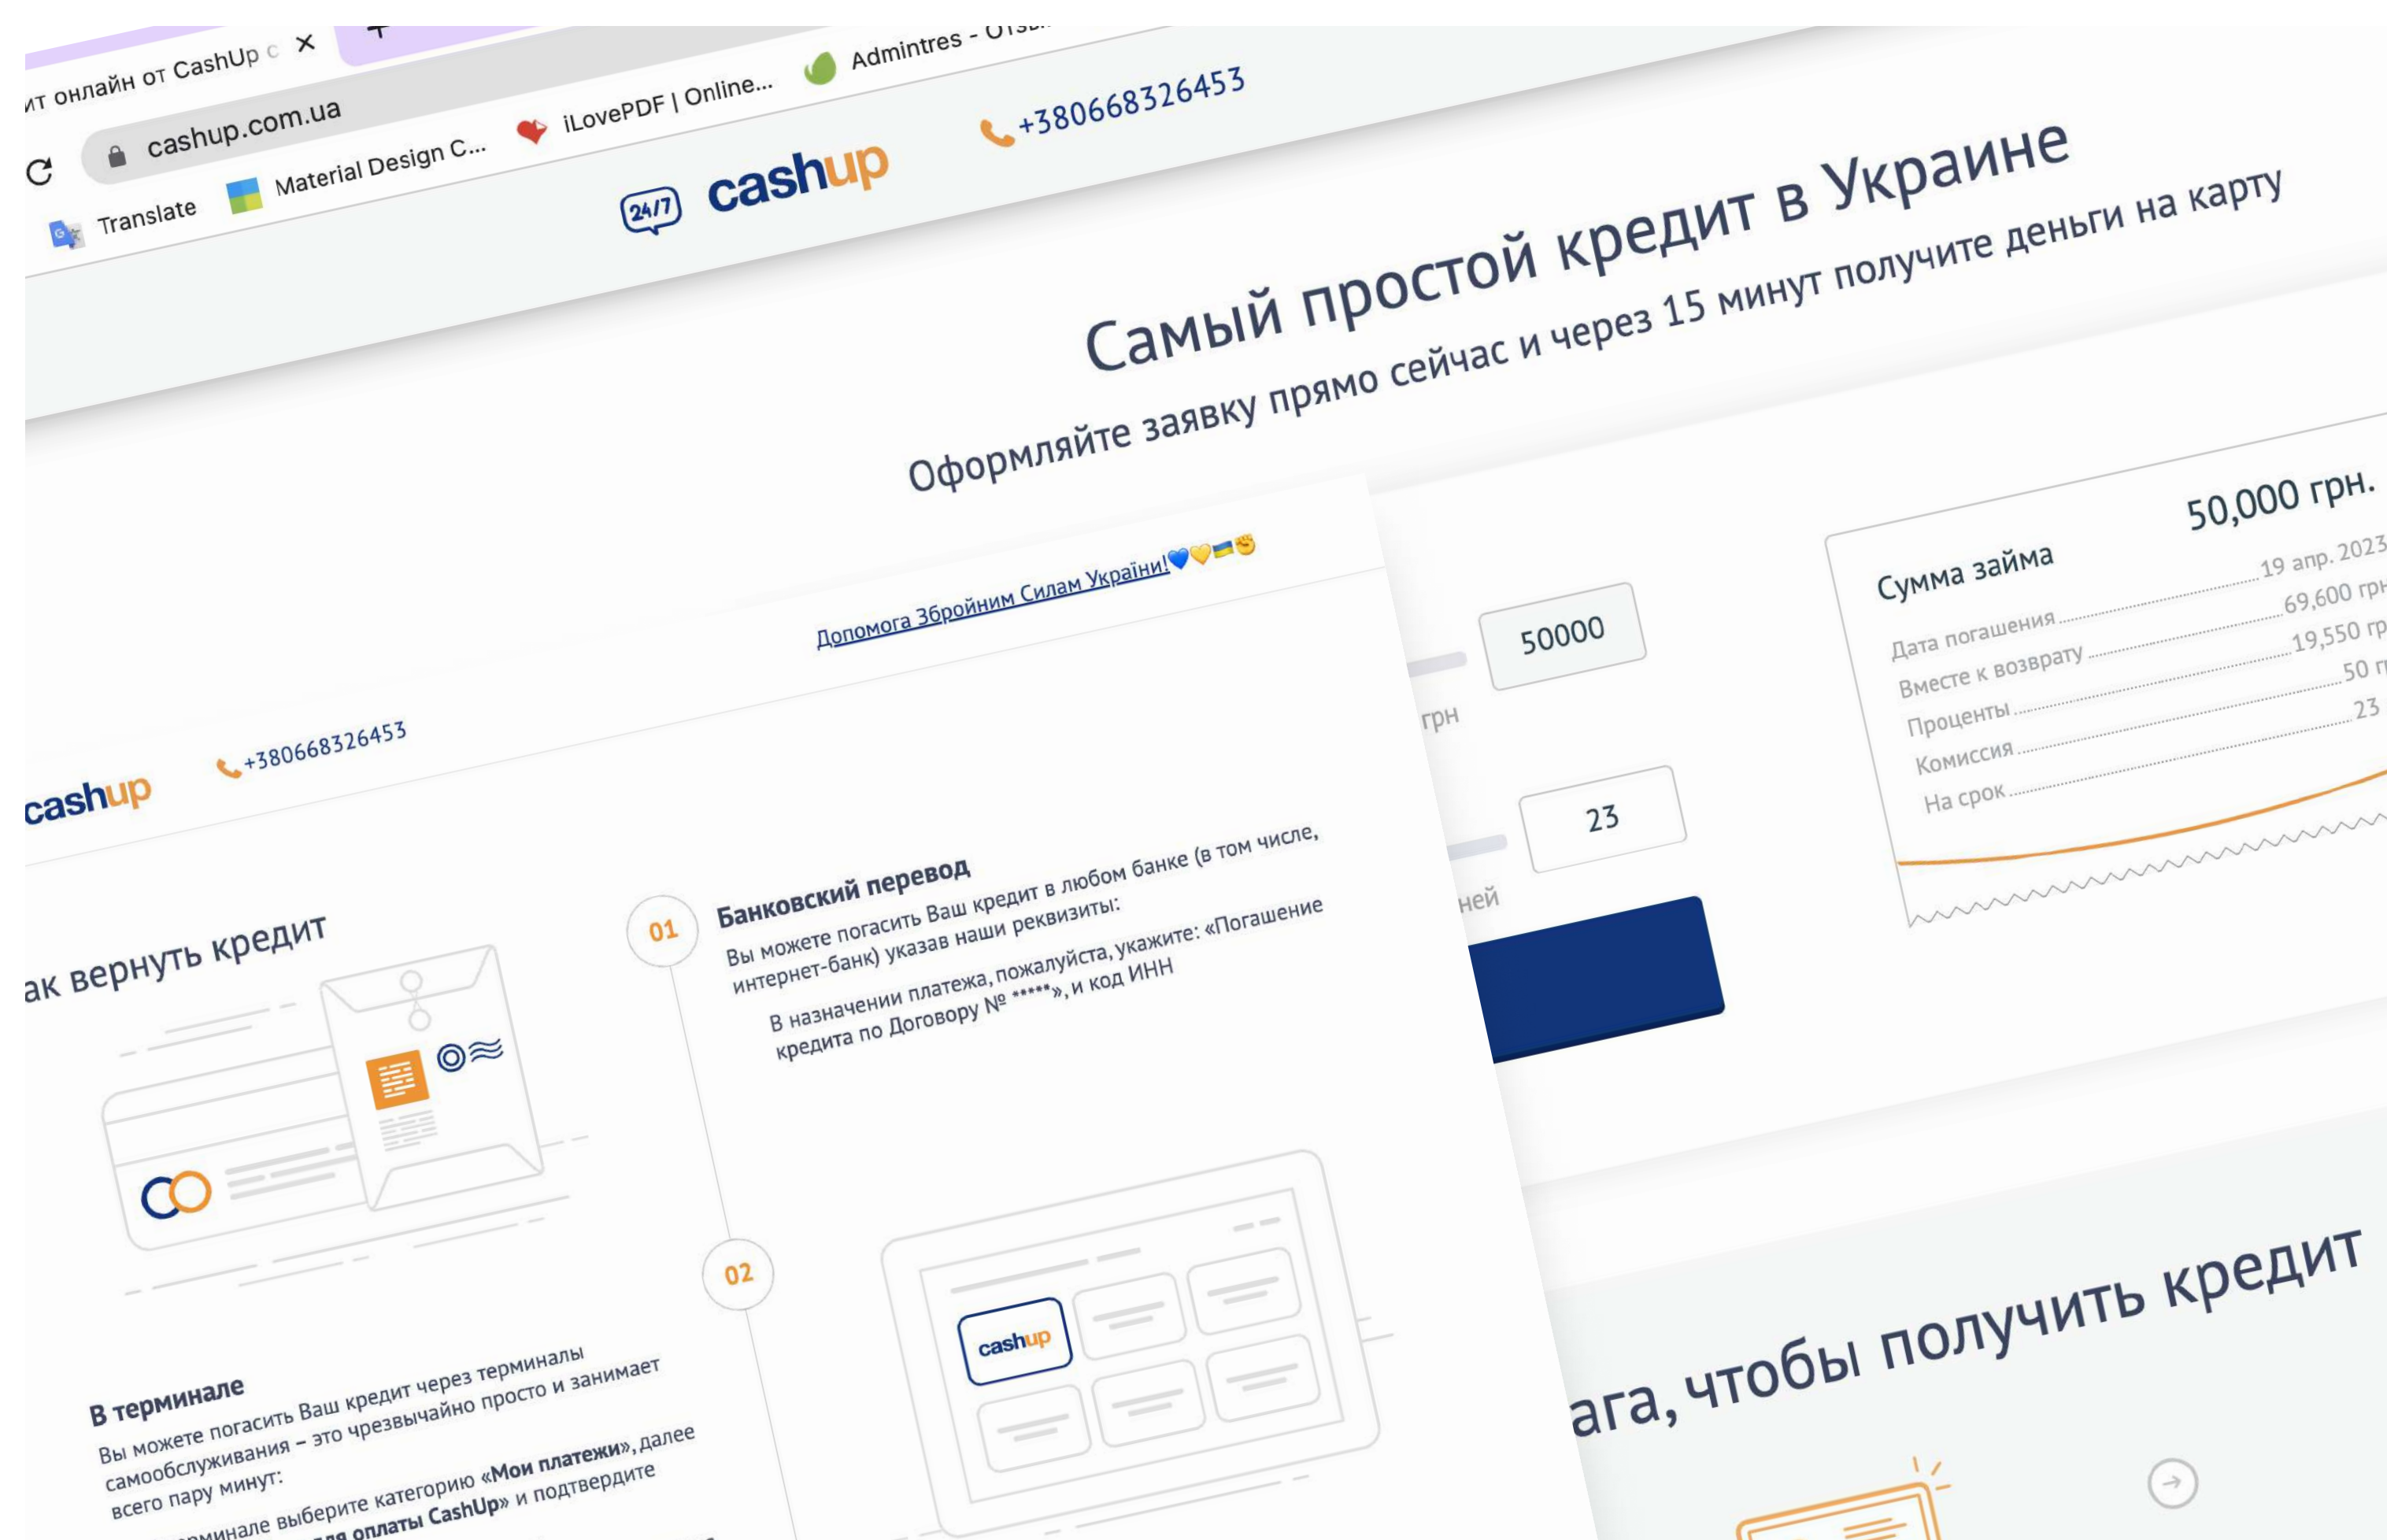

# CashUp

CashUp is an instant online loan service in Ukraine. We follow closely the development of the Western fintech industry. Therefore we could not ignore the express lending industry too. So, by 2016, we made the idea of fintech-startup a reality. Over the past two years the project had issued the total loans amount of over 100 million UAH. More than 20 thousand of customers are regular clients of the company and get a loan in less than 30 seconds.

Thanks to the credit scoring system based not only on the financial information and credit history of the borrower from the credit bureau, but also on patterns of customer behavior, social network data, other information from public sources, which indirectly characterizes the customer's financial capacity, we have developed an effective decision-making system.

App is a mobile application for an online card lending service. The development of a mobile application allows you to speed up the process of obtaining credit funds on any debit card. The application is constantly being improved, so today users even have the opportunity to log in with a fingerprint, so there is no risk of hacking their personal account.
